IDAHO

MYSTERY OF AMERICA'S FIRST HORSE - HAGERMAN FOSSIL BEDS

Equus
Equus simplicidens

Did you know...

The Hagerman Horse grazed Idaho's ancient savanna over three million years ago. Fossils indicate this zebra-like species continued to evolve until 10,000 years ago, when all traces of the creatures suddenly vanished. America's first horse...Was it a zebra? Was it a horse?
